

Clarinet reeds

German system

& White Master

Their cut is particularly designed to suit the characteristics of the German system (Oehler) clarinet mouthpieces.

- Matches perfectly with Vandoren D15, D20 and D25 mouthpieces and combines very well with other German mouthpieces.
- Wider reed tip than the White Master and White Master Traditional reeds.
- Outstanding, stable intonation.
- Excellent tone quality and light response.
- Large tonal dynamics.
- Noise free tone production.

		1,5	2	2,5	3	3,5	4

	X 50		CR862/50	CR8625/50	CR863/50		

The **White Master** are designed for German clarinet players. They are available in two versions:

- Traditional version
- New version: an evolution of the White Master reed, designed to suit more specifically the characteristics of the new generation of German mouthpieces (open mouthpieces with long facing).

The **White Master** range now includes **Eb clarinet reeds**. Easier sound emission, especially in the upper register of the clarinet. These reeds are suited to both German and Boehm systems.
